BEYOND TOMORROW

Seed Deck

Beyond Tomorrow exists to create a world where anyone can flourish.

We have started by building high-trust, authentic media company & community.
We will then invest & build tools for a post-singularity / longevity escape velocity world.

The first part is a 40–60x platform business, built to stabilize, de-risk & prepare.
The second part is a 10,000x moonshot, built to change the world.

The Problem

The world is changing much faster than anyone realises.

Technologies are growing exponentially but at the same time,
we have never been more dysregulated, disconnected & disinformed.

People are confused & scared at what's coming and are trying to find sense and clarity.
