BEYOND TOMORROW

FINANCIAL MODEL · CONFIDENTIAL 2026

Financial Model

Bottom-up, four years (2026 to 2029), aligned to the deck. A media-led business, with summits and products alongside, and an investment (SPV) arm that earns management fees today and carries long-term optionality kept out of the numbers. The full editable version is the Excel workbook.

Prepared with Expand Health for Julian Issa · September 2026, synced to the September deck. Revenue is a bottom-up build reconciled to the deck; the cost/EBITDA build is flagged for sign-off in Assumptions.

$22.6M
Revenue by 2029 (media-led)

$9.2M
EBITDA by 2029 (profitable from 2028)

$1.5M
Raise · $11M pre · $660k committed

Upside
SPV carry, long-term, not in the numbers

The story the numbers tell

Beyond Tomorrow is a media-led business. Sponsorship, AdSense and the newsletter are the engine and do the heavy lifting; the summits and products grow alongside; and the investment arm earns management fees today while its real prize, the carry, sits as long-term upside that is deliberately not in these numbers.

THE NUMBERS THAT CARRY THE STORY

- **$22.6M of revenue by 2029**, from $430k in 2026, reconciled to the deck.
- **Media is the driver**, growing to ~$11.6M by 2029. Summits add ~$8M, products ~$2.7M.
- **Breakeven in 2027, profitable from 2028**, reaching ~$9.2M EBITDA by 2029.
- **The SPV arm earns only a 0.8% fee here** (~$320k by 2029). Its carry is real long-term upside, kept out of the headline.

HOW TO READ IT

The whole model is a business you can underwrite: a media company that scales to a multiple of eight figures, profitable, with real summits and a products line from 2028. The investment arm sits on top, earning fees on the capital it deploys; the carry on that capital is the moonshot, left as upside rather than baked into the forecast. So the "show me the numbers" investor gets a $22.6M media-led business, and the "I believe in you" investor gets the carry optionality for free.

2027 is the inflection: the summit launches with a major conference provider, and the LP relationships for the capital vehicle get locked. 2028 and 2029 are where media compounds hardest, the summits scale and the products land.

> **What is solid vs what to probe.** The summit trajectory is grounded in a signed JV proposal. The media ramp to ~$11.6M and the cost build are bottom-up constructions flagged for sign-off. The SPV fee is Julian's 0.8%; carry is deliberately excluded.

Consolidated P&L, 2026 to 2029

All figures USD, reconciled to the deck. Media-led; SPV earns 0.8% management fees only, no carry.

USD	2026	2027	2028	2029
REVENUE				
Media (sponsorship, AdSense, newsletter)	$300K	$1.8M	$3.9M	$11.6M
Summits (conference-provider JV)	$130K	$1.6M	$3.0M	$8.0M
Products (from 2028)	$0	$0	$1.0M	$2.7M
Platform revenue	**$430K**	**$3.4M**	**$7.9M**	**$22.3M**
Investment / SPV — fees only (0.8%)	$0	$0	$96K	$320K
Total revenue	**$430K**	**$3.4M**	**$8.0M**	**$22.6M**
OPERATING COSTS				
Team & salaries	$280K	$1.3M	$2.0M	$4.0M
Marketing & distribution	$80K	$750K	$1.5M	$3.8M
Summit direct costs (JV share)	$130K	$850K	$1.6M	$2.4M
Content & production	$40K	$350K	$400K	$900K
Product COGS & fulfilment	$0	$0	$500K	$1.35M
Investment arm (deal team)	$0	$60K	$120K	$200K
Technology & product	$30K	$90K	$250K	$500K
Legal, accounting & ops	$30K	$60K	$120K	$250K
Total operating costs	**$590K**	**$3.46M**	**$6.49M**	**$13.4M**
PROFITABILITY				

USD	2026	2027	2028	2029
EBITDA	**($160K)**	**($60K)**	**$1.51M**	**$9.2M**
EBITDA margin	nm	nm	19%	41%
Tax (20%)	$0	$0	($302K)	($1.84M)
Net profit / (loss)	**($160K)**	**($60K)**	**$1.21M**	**$7.36M**
CASH				
Opening cash	$0	$1.34M	$1.28M	$2.49M
+ Raise	$1.5M	$0	$0	$0
+ Net profit / (loss)	($160K)	($60K)	$1.21M	$7.36M
Closing cash	**$1.34M**	**$1.28M**	**$2.49M**	**$9.85M**

Loss-making in 2026, close to breakeven in 2027 as the raise funds the team and content build, profitable from 2028, scaling to a ~41% EBITDA margin by 2029 as high-margin media dominates the mix. Cash never dips below ~$1.28M on the $1.5M raise; no second raise assumed. None of this depends on SPV carry.

Revenue build, by arm

Media is the driver. Each arm built from its own lines; the four sum to the deck totals.

USD	2026	2027	2028	2029
MEDIA — SPONSORSHIP & AUDIENCE				
Flagship sponsor 1	$100K	$520K	$1.3M	$4.0M
Flagship sponsor 2	$80K	$460K	$1.0M	$3.2M
Mid-tier sponsors	$60K	$350K	$700K	$1.8M
Newsletter & web placements	$40K	$250K	$500K	$1.5M
AdSense / YouTube Partner	$20K	$220K	$400K	$1.08M
Media subtotal	**$300K**	**$1.8M**	**$3.9M**	**$11.6M**
SUMMITS (BT SHARE)				
Satellites (US & Europe events)	$130K	$500K	$700K	$1.0M
Flagship summit (US, from Sept 2027)	$0	$1.1M	$2.3M	$7.0M
Summits subtotal	**$130K**	**$1.6M**	**$3.0M**	**$8.0M**
PRODUCTS (FROM 2028)				
Co-branded longevity products	$0	$0	$1.0M	$2.7M
INVESTMENT / SPV				
AUM deployed (cumulative)	$0	$0	$12.0M	$40.0M
Management fee (0.8% of AUM)	$0	$0	$96K	$320K
Carry (long-term, not in numbers)	$0	$0	$0	$0
Total revenue	**$430K**	**$3.4M**	**$8.0M**	**$22.6M**

Media compounds from $1.8M (2027) to ~$11.6M (2029), and it is the main driver of the $22.6M. Summits and products fill in behind; the SPV arm earns fees on rising AUM.

Summits — the conference-provider joint venture

A 12-month JV with a major conference provider: three satellite activations in the US and Europe that prove the format, then a standalone flagship summit in the US, then scaled. Figures are gross event revenue; the P&L counts Beyond Tomorrow's contribution.

STAGE	TIMING	GROSS REVENUE	SPONSORS
Satellite I (US)	Autumn 2026	$43–68K	9 across 3 tiers
Longevity congress, US (full day)	Dec 2026	$103–152K	10 + 100–150 VIP
Satellite II (Europe)	Jun 2027	$40–56K	8 across 3 tiers
The flagship summit, US (standalone)	Sep 2027	title $50K+ · 300+ VIP @ $2K	2-day flagship

3-YEAR TRAJECTORY (JV)	2026 PROVE	2027 LAUNCH (US)	2028+ SCALE
Revenue	$186–276K	$1.2–1.8M	$3.0M+
Costs	$180–270K	$680–960K	$1.6M+
Net	**~break-even**	**$520–840K**	**$1.4M+**
Net margin	~0%	~45%	~47%

2026 is a deliberate break-even proving year. Every step is gated go / no-go on the prior event's response. The flagship is in the US, September 2027, and scales to European and Asian editions.

Investment / SPV arm — fees now, carry later

SPVs sourced from summit deal-flow. Per Julian, the model counts only the 0.8% management fee on AUM. Carry is real but long-term, and is deliberately excluded from these numbers.

USD	2026	2027	2028	2029
SPVs deployed in year	0	0 (LP relationships locked)	3–4 (first deployments)	5–8
Cumulative AUM	$0	$0	$12.0M	$40.0M
REVENUE TO BT				
Management fee (0.8% of AUM)	$0	$0	$96K	$320K
Carry (excluded — long-term upside)	$0	$0	$0	$0
Total to BT (in model)	**$0**	**$0**	**$96K**	**$320K**

Why carry is left out. Carry only crystallises when the underlying companies exit, which is years out and unknowable over this horizon. Modelling it would put a speculative number in the headline. Instead the arm is shown at fees only, and the carry, ~20% of the gains on ~$40M+ of AUM, is genuine long-term upside on top of an already-profitable, media-led business.

Capital & return

A $1.5M seed at $11M pre-money. $660k committed; $20k SEIS remaining (advanced assurance approved).

USE OF FUNDS	AMOUNT	%	WHAT IT BUILDS
Team & Operations	$600K	40%	Head of Commercial, Senior Producer, content, ops/finance
Content & Distribution	$525K	35%	Studio, video team, paid distribution, the audience flywheel
Summit Execution	$225K	15%	Satellite activations + flagship summit pre-development
Working Capital Buffer	$150K	10%	Legal, accounting, contingency
Total raise	**$1.5M**	**100%**	

RETURN PROFILE	2026	2027	2028	2029
EBITDA	($160K)	($60K)	$1.51M	$9.2M
Closing cash	$1.34M	$1.28M	$2.49M	$9.85M
Cumulative net profit	($160K)	($220K)	$988K	$8.35M

The raise funds 2026 and a near-breakeven 2027; the business is self-funding from 2028. On $1.5M in, a ~$22.6M profitable media business supports the deck's "40–60×" framing, and the SPV carry is the asymmetric upside above that.

Scenarios & sensitivity

The base case does not need the carry. 2029 revenue and EBITDA under three cases.

2029	DOWNSIDE	BASE (MODELLED)	+ CARRY (LONG-TERM)
Media	$10.0M	$11.6M	$11.6M
Summits	$2.5M	$8.0M	$8.0M
Products	$1.5M	$2.7M	$2.7M
SPV fees	$0.3M	$0.3M	$0.3M
SPV carry	$0	$0	upside
Total revenue	**$14.3M**	**$22.6M**	**$22.6M + carry**
Profitable?	Yes	Yes	Yes

Even in the downside, with media softer and products and summits behind plan, the company is still a profitable ~$14M business. The base case is a profitable $22.6M. And the carry, if and when it lands, is pure upside on a business that already works.

Enterprise value — the two engines

Value the platform on a media multiple, and treat the investment arm as separate optionality.

COMPONENT	BASIS	2029 VALUE (INDICATIVE)
Platform (media + summits + products)	~$22.3M revenue × ~4–5× (media / creator comps)	~$90–110M
Investment arm — fee stream	~$40M AUM, management-fee business	~$3–6M
Investment arm — carry / deal upside	~20% carry on a growing SPV portfolio	The moonshot
Combined	**Platform underwritten + carry optionality**	**$95M+ and asymmetric**

> On the raise of $1.5M, the platform alone is the deck's "40–60×" business. The carry is where the "10,000×" language comes from: Beyond Tomorrow earns a share of the companies it helps build, and a single trillion-dollar outcome dwarfs the platform. Values are indicative.

Assumptions — flagged for sign-off

Revenue reconciles to the deck. Each line flagged by how much to trust it.

INPUT	ASSUMPTION	CONFIDENCE
Raise / valuation	$1.5M at $11M pre, $660k committed, $20k SEIS left	FROM DECK
Media — the driver	Sponsors + AdSense + newsletter; ~$35k MRR by Aug 2026; scales to ~$11.6M by 2029	AGGRESSIVE RAMP
Summits	Conference-provider JV; documented trajectory; flagship (US) Sept 2027	GROUNDED
Products	Co-branded longevity products, from 2028 → $2.7M by 2029, ~50% COGS	AGGRESSIVE 2029
SPV management fee	0.8% of AUM (Julian's input)	CONFIRMED
SPV carry	Excluded from the model — long-term upside only	CONFIRMED
SPV AUM	First SPVs deployed 2028; $12M (2028) → $40M (2029) cumulative	TO SIGN OFF
Cost build	Team, marketing, content, events, COGS scale with revenue	CONSTRUCTION
Tax	20% on taxable profit from 2028	STANDARD
Basis	Calendar year 2026–2029; no second raise assumed	SET

> The biggest thing to sign off is the media ramp to ~$11.6M by 2029, a large part of the deck's $22.6M now that carry is excluded. It is aggressive by design; the summit and SPV-fee mechanics are set. All drivers are the yellow cells in the Excel.

Confidential. Beyond Tomorrow Media Ltd. Revenue reconciles to the deck; the cost/EBITDA build is a bottom-up construction flagged for sign-off. Projections, not guarantees. Prepared with Expand Health for Julian Issa · September 2026.
